Subject: July 2015 Missing/Invalid/Flagged Data Summary
Attachments: 07 Jul 2015 Continuous Missing-Invalid Data.docx

The attached file contains a summary of the invalid data and periods where six or more consecutive hours of data were lost or flagged (excluding scheduled calibrations, audits, etc.) for the month of **June 2015**. This data has been removed from the data files (except where noted for Hole fill or Flagged as Suspect). The summary is based on the review of zero / span control charts, missing data records, manual calibration data, performance audit data and out-of-tolerance notices (from both paper and electronic format).

Please note that there were several sites/periods for elevated particulate levels that were coded Information-Only on 7/4/15-7/5/15 for fireworks/Canadian wildfires and 7/6/15-7/7/15 for Canadian wildfires. There were also many periods of flagged/missing data that occurred due to migration to new logger codes and some bugs that were discovered in the process.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
